Clean Ladders & Stairs for HACCP

What is HACCP ?

The "Hazard Analysis and Critical Control Point" concept (HACCP) was developed in the USA in 1959, when an American food-processing company was instructed by the National Space Agency (NASA) to produce 100%-safe food for consumption in space. This preventive concept was then further developed in collaboration with NASA and was published and documented as the HACCP in the USA in 1971. It was only in 1985 that its implementation was recommended to all food business operators by the US National Academy of Science (NAS). Since then, the system has been tested and further developed worldwide.

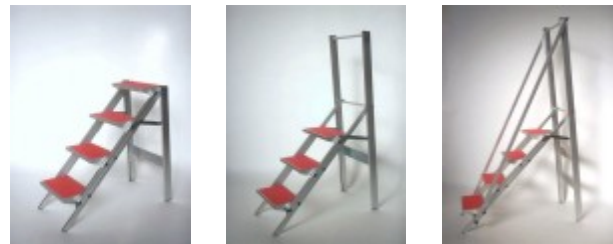

SKYLAX ladders & portable folding stairs go HACCP

Ladders in offices, stores, supermarkets, hospitals, pharmaceutical and food industry belong to the dirtiest things. SKYLAX access equipment is manufactured with new material and new procedures; it sets the standard to meet the HACCP requirements:

- **Ladder profiles and ladder treads are made of anodized aluminium**, easy to clean and efficient over years to protect aluminium from corrosion and operators from black aluminium-oxide abrasion.
- **Treads are covered with non-slip foam layers with closed cells**. Closed cells inhibit absorption of water, oil, grease or fat and permit instant cleaning without solvents.
- **FDA Approval**. All Skylax HACCP ladders and stairs come also with red glossy STAR-coating which is:
 - Resistant against oil, fat, acids, salt, halogen, UV- & environmental stress
 - Insulated electrically up to 1000 VAC
 - Easy to clean

Thanks to these characteristics, Skylax HACCP equipments are irreplaceable in environments with high standards of hygiene such as:

- Food industry
- Chemical industry
- Pharmaceutical industry
- Slaughterhouses
- Cold rooms
- Catering
- Food stores
- Supermarkets
- Logistics
- Hospitals and laboratories
- Office
- Restaurants, kiosks, canteens

CD upon request.

Manufactured by: Skylax S.r.l.

Country of Origin: Italy

<p>CityStep (non HACCP)</p>	<p>CityStar HACCP glossy red coating</p>
	
<p>CountryStep (non HACCP)</p>	<p>CountryStar HACCP glossy red coating</p>
	
<p>Telescopic Leveler</p>	<p>Self-locking bolt hinge</p>
	

Instant Cleaning

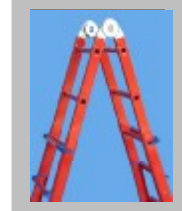

3-7 Atmosphere

Anodized

STAR

STAR

Attention:

- **Tread layers made of sponge with closed cells**
- **Anodized aluminium**
- **Shiny red STAR-coating**

Repell:

- **Water**
- **Petroleum, oil, tar**
- **Fat, grease**
- **Acids, phenol a.o.**

Easy to clean with high pressure cleaners:

- **Tread layers turn clean**
- **Aluminium profiles turn clean**
- **Aluminium plates turn clean**
- **Colors turn brilliant**

Components:

- (AL) Extruded aluminium profile
- (AL) Aluminium plate
- (FE) Galvanized steel
- (PA) Polyamide 6
- (PA) Polyamide 6 reinforced with glass fibers
- (PE) Self-adhesive polyethylene foam
- (PET) Self-adhesive polyester foil
- (PUR) Self-adhesive polyurethane bumper
